

McGee's Stamp & Trophy Co.

Electronic Artwork Guidelines

We try to make it very, very easy for our customers to get artwork to us in a format we can use and produce your products with the best possible quality we can produce.

The following formats are preferred by the standards set by our industry.

CorelDRAW® X3

File formats we can accept other than the ones to the left are.

Adobe® Illustrator® CS2

JPG 300 dpi or higher
png (preferably to size)
tiff 300 dpi or higher
eps (vector only not raster saved as)

Adobe® PDF

* MICROSOFT WORD OR WordPerfect

Adobe® Photoshop® CS2

If you intend to send a Word Perfect or Microsoft Office Word or Excel document you need to know that **fonts do not carry over.** (which means if you make a .doc in a certain font and we don't have that font it will not tell us that it isn't the right font it will simply exchange it for the default font on our computer. There is usually a way to make a word document into a PDF we can use. Just call and we will walk you through doing it.

* Above files **FONTS MUST BE OUTLINED**
OR CONVERTED TO CURVES.
